RELEASE

August 2006

Inside 90° Bracket

- **Designed For Safety**
Allows 90° turn while keeping posts on the outside of the riding area for optimum horse and rider safety
- **Clean, Neat Appearance**
Unique design blends into the overall look of the rail and allows the rail to be tensioned even at this acute angle
- **Great Variety**
4", 5" & 6" widths in white, black and brown colors
- **Durable and Strong**
Made of heavy gauge metal and fastened with two 3/8" lag screws
(see chart below)
- **Double Coated**
Hot Dipped Galvanized and Powder Coated
- **Unmatched Warranty**
If it breaks we will replace it

3/8" Lag screw length determined by post density

Dense Southern Yellow Pine	3"
Softer Red & White Pine	3 1/2"
Cedar/Lodge Pole, Ponderosa	4"

NOTES

1. pre-drill 1/4" diameter hole
2. *when in doubt*—use a longer length screw or use a carriage bolt through the post
3. hot-dipped galvanized washer—*optional*
4. small amount of grease on lag screw assists installation

The All New T-Buckle for Cross-Fencing

Another problem-solving innovation added to the growing list of System Components for the **Total Fencing System** from Horsetail.

- **Materials**
One piece of hardware, one end post, two 3/8" lag screws. *(see chart above)*
- **Double Coated**
Hot Dipped Galvanized and Powder Coated
- **Great Variety**
4", 5" & 6" widths in white, black and brown colors
